api.net.bd

Advanced Project Integration Limited in short API is a software development company in Bangladesh. Our specialties lay in very cost-effective rapid prototyping, full-cycle software development and testing/QA, sustaining/maintaining and supporting existing software and infrastructure and AI based IoT product development.

**Our current specialized team consists a range of:**

AWS Solution Architect

Software Architects/Analysts

Software Project Managers

Software Engineers

QA Engineers

IT Engineers

Depending on customer needs, API can provide individual or team (single or cross-functional level) projects or time-based billing in a competitive package within the shortest possible time. We love to discuss each individual customer needs, whether they are at the Primary, Medium, Built or post Built stage and we strive to address those specific needs with the utmost of care, dedication, and sincerity.

Note that, as a software development company, we do not rely solely on marketing or outright sales efforts to generate our business and prove our credibility. Rather, our track record is built upon timely deliverance of projects to our clients over the years and their testimonies of satisfactory performances speak for themselves. That is why we call our sales team more of a Technical Analyst team, who can discuss their dream projects with clients, assess related technical problems, and suggest cost effective and timely solutions to resolve them by providing a win-to-win solution for both the parties.

## EXCELLENCE

- API is moving forward with absolute focus on understanding the market needs with up-to-date technological services and providing all kinds of support services according to the organizational requirements of each client.
- API aspires to make new revelations in business communication technology by raising the existing barrier and setting new standards for others to follow.
- API carries the laurels of yesterdays to achieve far greater accomplishments in the future, as it celebrates with the passage of time, the maintenance of global standards and continues to grow even further.
- API has been the strategic partner of the global cloud platform leader AWS.

## VISION

- To be the leader in the IT sector, with new ideas, and new technological developments; we never want to set a limit to learning. We want to be the best and provide the best standard service in the sector.
- Work with different types of technology, technological solutions, and new applications which teaches us to take challenges and win.
- Quality Service is our motto. We always look forward to your specific need to provide you with the best suitable quality solution where quality service is the key factor.
- We work with current technologies to create new technology for the future. We focus on future technologies to keep you upgraded always.
- Be the premium cloud service provider around the globe.

## MISSION

- We envision customer needs as our highest priority.
- Generating new ideas and developing high quality solutions and applications and providing the best services.
- Enhance shareholders value, invest in continuous HR development to attract, develop, and retain the best talent in the field.

## THE TECHNOLOGIES WE SPECIALIZE IN

## PRODUCTS OFFERING:

### GAS LEAKAGE DETECTION & NOTIFICATION

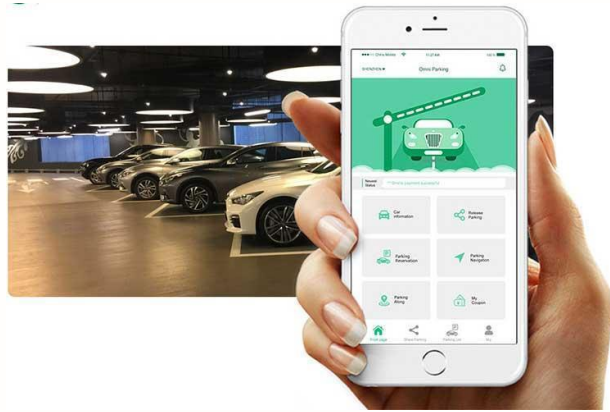

- Get notified about the gas leakage wherever you are.
- Workable in any place. Works with a SIM so, no internet dependency is there.
- Sensor type: electrochemical sensor
- Range: 200-10000 ppm
- Working Voltage: AC100-240Vac 50-60Hz, DC5V
- Target Gas: Natural Gas, LPG
- Working Conditions: Temperature: 0°C- 65°C Humidity: <75%RH
- Consumption: 5W
- Size 107mm X 61mm (PCB Size)

### WEIGHT ALARM & NOTIFICATION

- App based solution
- Get notified before your gas cylinder gets empty
- Notification can be send to the supplier so, s/he can replace the cylinder with a new one
- Threshold can be set according to the need
- Easy to use

## SMART PARKING SOLUTION

- Pre Book your parking space before you reach to the destination
- Enhanced security using image processing so, none else can get out with your car
- Sensor detects automatically when you reach or leave the parking
- Smart Dashboard
- Parking Management
- Parking Data
- Easy accessible app

## HOME / OFFICE AUTOMATION

- Centralized control of home / office system via smartphone
- Control your home / office devices such as light, fan, ac, tv etc. from anywhere in the world
- You can even open your door when you are out of your home / office and someone needs to enter inside your home
- Simplification of complex tasks
- Enhancement of lifestyle
- Save energy significantly, thus saving on electricity bills
- Monitor security of your home even when you are miles away
